DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a circuit device, classified in class 257, subclass 758.
 - II. Claims 18-21, drawn to a circuit device manufacturing method, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of removing the back surface of the conductive foil until the insulating resin is exposed, you could have not formed the conductive foil on the insulating resin that you wanted exposed.
